

MasterSeal Extreme

Automatic Heat Assist Cold Laminator

Specifications

Max Lamination Width	1630mm
Max Lamination Thickness	35mm
Max Speed	30m/min
Temperature	Room temp-60°C (cold), 90-120°C (hot)
Up/Down Lifting	Electricity
Heating Type	Infrared
Warm Up Time	5-10min
Motor Type	Brushless DC servo motor
Power Input	1500w
Input Voltage	110/220V
Net Weight	260/300kg

MasterSeal Extreme

Automatic Heat Assist Cold Laminator

- ✓ Simple electrically operated roller lifting instead of air-control – no need for a compressor
- ✓ Infrared sensor to detect foreign objects

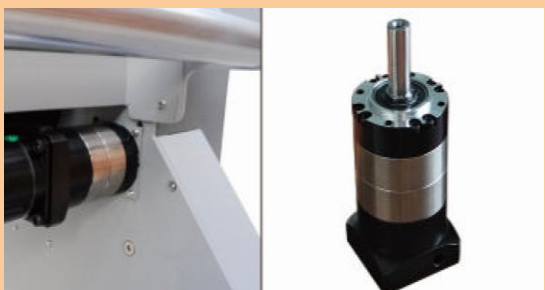

- ✓ Industrial grade handles
- ✓ Automatic cutting to save time and money

- ✓ Media use-up reminder stops film sticking to roller
- ✓ Smart foot pedal to control speed for steady and precise laminating

- ✓ Clear static device to remove static during laminating

- ✓ High precision reduction gear for more efficiency and torque and less noise
